TABLE OF CONTENTS

FMG Spidertech

p. 132-147

Spidertech™ Integrated System offers the sailmaker the revolutionary way to design membrane sails.

Three product lines provide fast delivery and best price on basic products and the highest level of customization through the use of proprietary software.

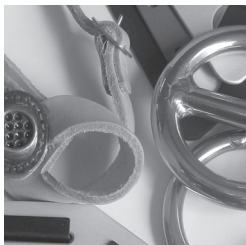

With Spidertech™ sails are lighter and tougher, the best quality product available in the market.

FMG Sailcloth

p. 148-161

FMG provides sailmakers worldwide with excellent sailcloth and high quality accessories at the best price. With twenty years of experience in this field we looked at what is offered today in the market and we have decided to rationalize the range with the objective of providing the best quality at the best prices.

FMG Hardware

p. 162-221

Comprehensive range of FMG hardware and accessories for sailmakers & upholsterers: full product range, from technical fabrics for patches and local reinforcements, to full range of accessories for the making of sails, battens included. FMG has a complete range of tools and equipment for sailmakers and upholsterers.

FMG Customization

p. 222-225

We have always offered in conjunction with our fabrics services and customization as well. Today FMG has enlarged the offer for customization of the materials according to the production process, in order to satisfy the productive and logistical needs of our Customers.

FMG Training

p. 226-229

For those sailmakers who wish to evolve towards the design of fiber oriented sails, five modulous parts of the Spidertech™ sw package are offered: SpiderPlan, SpiderRig, SpiderMould, SpiderFibre, SpiderPhotoAnalysis.

Training is also offered on Maxsurf to yacht designers, software for the design of marine vessels. To textiles converters we offer operational training on the cutting machine FMG plotter/cutter.
